

Edel Tennis Advantage RedCourt

The playing properties and appearance of traditional clay, but all the advantages of an all-weather court. These were the requirements that defined the development of the Edel Tennis Advantage RedCourt. As a result, the playing properties of the Edel Tennis Advantage RedCourt are practically identical to those of a traditional clay court on which the player can turn, pivot and slide under control. The big difference between this and clay, however, is that on the Edel Tennis Advantage RedCourt you can play the whole year round with relatively low maintenance costs!

The best alternative to nature

Product characteristics

EDEL TENNIS ADVANTAGE REDCOURT

The Edel Tennis Advantage RedCourt stands for:

- The playing properties of traditional clay courts (including ball print)
- Polyethylene TenCate LSR® (Low Sliding Resistance) fibres
- Sprinkler system not required
- Can be played on in almost all weather conditions
- Integrated line markings (15 mm; fibre playing surface is 13 mm)
- Suitable for both indoor (inflatable indoor courts) and outdoor use
- Easy to maintain
- A durable alternative to traditional clay courts

Construction

Edel Tennis Advantage RedCourt can be used with a variety of substrates, and remains ITF certified under these conditions. As a result, the system can be customised for any location.

Fibre type	: Fibrillated tape
Colour	: Clay red
Line markings	: White
Run off areas	: Clay red
Infill	: Red ceramic sand

TenCate and LSR are registered and/or claimed trade marks of Koninklijke Ten Cate nv and/or its operating companies.

*The all-weather alternative
to gravel.*
